➤ **Point of Interest, *Vehicles approaching aircraft with engines running***

- Envoy recently received a pilot report that fueling vehicles were approaching and even opening the fuel panel with the *aircraft engines still running*.
- Please pass along the attached CAUTION to all your fuelers.
- I will be adding this to our Fuel Servicing Procedure's Manual with our next revision.

CAUTION:

NEVER position fueling vehicles/carts next to an aircraft until the engines are shut down and the rotating beacon(s) are turned off.
